

ABDELMONEIM FARUG ABDELMONEIM MOHAMMED

Information Security Engineer

About me

- I am an information security and technology professional with a career spanning more than 10 years in IT industries. Over my career I started as network engineer and system engineer with hands-on experience architecting IT infrastructure solutions.
- For last five years I focused on network security and information security developing risk based information security strategies implementing risk based policies and standards compliance.
- Currently I work as cybersecurity trainer and independent security consultant.

Certified

- **CCNA, CCNP RS.**
- **MCSA.**
- **CCNA, CCNP DC.**
- **PMP.**
- **CISSP.**

Working History

- | | |
|--------------------|--|
| 2007 - 2010 | ZAT ALEMAD Steel Factory. Network Engineer |
| 2010 - 2012 | ALQESR ALMUMMIZ Furniture Riyadh. System administrator. |
| 2012 - 2016 | Abdullah Al-Othaim Markets Riyadh. Network engineer /Data Center security supervisor. |
| 2017 - 2018 | Freelancer Riyadh IT project manager. |
| 2019 - | Network plus training center Cybersecurity Trainer and consultant |

WORKING EXPERIENCES

- ISO/IEC27000 framework compliance.
- Implementing RMF activities leading to risk based information security.

Sudan Khartoum North

Education

- B.Sc. (Honors) Engineering
Electronic Engineering
Technology
(Telecommunication & Control)
(1999_2004).
University Of Gezira

Trannings and Courses

- CISCO CCNA
IBDAA Advanced Training
Center 2007.
- Project Management
Professional PMP
MILESTONE Training Center.
- Security awareness ISC2.
- Building high performing
cybersecurity team ISC2.
- Building a strong culture of
security ISC2.
Moving to cloud ISC2.

Soft Skills

- IT project management
- Requirement analysis and
scoping.
- Business aligment.
- Communications
- Team Leadership.
- Alternative Generation.
- Problem solving.
- Analytical.
- scketching
- Time Management.
- negotiation.
- Presentation.
- Auditing and Reporting skills.
- Languages
 - Arabic.
 - English.
- Computer skills
 - Microsoft Project.
 - Microsoft Office.
 - VISIO.

- Coordinate RMF tasks associated with the effort with the cybersecurity lead.
- Develop, refine and implement enterprise security policies, procedures, and standards across multiple platform and application environments to meet compliance responsibilities.
- Accomplish system categorization, security control selection, security control implementation, security control assessment, and security control monitoring.
- Manage the implementation of IT security for multiple IT functional areas (e.g., applications, operating systems, network and/or Web) across the enterprise, ensure that all security measures are in place (firewall, anti-spam, anti-spyware, anti-virus, backup, data encryption, intrusion detection/prevention systems etc.) to protect information and IT assets.
- Manage information security audits, analysis, vulnerability assessments, intrusion detection/prevention to ensure that systems are secured and provide recommendations as required.
- Assess threats and vulnerabilities for information assets.
- Develop a contingency plan, disaster recovery plan and business continuity plan to safeguard IT infrastructure & systems against accidental or unauthorized modification, destruction, or disclosure as well as to mitigate the effects of any possible halts or impediments to the IT system.
- Work collaboratively with others IT Managers and teams to design secure infrastructure solutions and applications and actively participate in the execution of multi-faceted projects related to security, and infrastructure/information asset protection.
- Design and implement secure network solutions network segmentation network access control.
- Design remote access solutions site to site VPN hub spoke VPN and proxy.
- Design and implement SOC solutions.
- Build and train high performance cybersecurity team.

Member of

- Project Management Institute PMI 2017.
Member ID 4662191
- Kingdom of Saudi Arabia PMI chapter 2017.
- (ISC)² CISSP member ID 714981 2019.
- Active member in cybersecurity communities.

PLATFORMS

- **CISCO**
 - Cisco ASA Firewall 55XX with IOS 8, XX 9, XX.
Cisco ASA 5508 with firepower.

- ISE version 1.1.3.
- Cisco ACS server V5.3.
- Cisco NGIPS model 4125.
- Cisco S-series Web Security Appliance.
- Cisco Email Security Appliance C190.
- Cisco Content Security Management Appliance M190.
- Cisco NAC Posture Agent v4.5.
- Cisco NGDC ACI NEXUS.
- Cisco UCS servers.
- CISCO 12.xx and 15.xx ISO routers and switches.
- **Palo Alto**
 - Palo Alto UTM PAN OS 6.x 7.x 8.x.
 - Palo Alto PANORAMA 6 7 .
 - Palo Alto Threat intelligence Wildfire
- **Fortinet**
 - Fortigate UTM 5.x,6.x
 - Fortimanager 6.x.
 - Fortianalyzer 6.x.
- **Huawei.**
 - USG6700E
- **Splunk**
 - Splunk ES 4.X.X , 6.X.X.
- **Network traffic analysis tools.**
 - Wireshark, GFI LanGuard, Fiddler, PRTG Network Monitor, WirelessNetView.
- **Penetration testing platforms.**
 - Kali ,Parrot, Black Arch
