PROFESSIONAL SUMMARY

Professional Master qualified Health & Safety Manager with 3 years of expertise improving QHSE standards. Expert in developing and implementing QHSE strategy and solutions, reducing risk and increasing profit.

WORK EXPERIENCE

Sarl ELDIS

May 2016 — Oct 2019

HSE Engineer

- Administered safety tests to assess machinery and equipment and determine potential faults or issues needing repair.
- Created and deployed risk and injury avoidance techniques and emergency protocols in coordination with company leaders.
- Monitored and recorded environmental performance metrics to measure and report cooperation with environmental goals and requirements.
- Reviewed and reported on safety measures and workplace incidents, spearheading committees and initiatives driving vital change in workplace environments.
- Observed, assessed and reviewed day-to-day operations and production to verify compliance with regulations for emissions and waste.
- Drove internal policies on operations and safety to minimise costs and risks by safeguarding property, equipment and employees.
- Created boardroom and courtroom multimedia presentations including video and text-sync'd depositions for enhanced understanding.
- Developed new process for employee evaluation which resulted in marked performance improvements.
- Obtained documents, clearances, certificates and approvals from local, state and federal agencies.

Shlumberger

DEC 2017 — Jan 2018

HSE Intern

- Trained new employees in proper safety procedures to minimise accidents with proper behaviors.
- Developed recommendations to reduce hazards by improving gear, behaviors and procedures.
- Built successful hygiene programmes based on techniques such as atmospheric monitoring and noise surveys to provide ongoing worker support.
- Identified accident causes and optimal prevention strategies by conducting thorough investigations and analyses.
- Developed and maintained hygiene programs, including noise surveys, atmospheric monitoring and hazardous material management plans.
- Sampled suspect materials to assess hazards and devise cleanup procedures.
- Collected samples of materials and coordinated testing for hazardous conditions.
- Optimized new employee training on gear and procedures to maximise team safety.
