Block 45, Arkaweet, Khartoum Sudan

OBJECTIVE

Dedicated and experienced telecom engineer with proven success career in telecom implementation management, HSE and quality control for large-size telecom organizations. Offering more than 5 years of experience in this field. Seeking an opportunities and new challenge to merge my experience in telecom management with my passion in database, data analysis and big data management which come over through courses and self-learning.

EXPERIENCE

Jan 2018 - Present

- **Huawei - Leased Staff**

HSE & Quality Control TeamLeader

Leading more than 12 QC members, prepare Q&HSE plans, hold trainings for the stakeholders, prepare the SOP, follow up the project, analyzing gaps and make improvement plans, follow the acceptance with customer and document the projects' outputs and lessons learned.

Responsible for database management for all teams (labors) and their qualifications.

Oct 2016 - Dec 2017

- **Huawei - Leased Staff**

HSE & Quality Control

*On_site audit fo assure the quality during and after installation.

*Provide technical support on_site when needed.

Oct 2015 - Oct 2016

- **Huawei - Leased Staff**

Implementation Engineer

Responsible for Rollout target achievement and site-level database.

Responsible for P2P (PO to Payment), issuing POs, Material Requests, Delivery Notes, Material on Site, Installation follow up, Integration, Troubleshooting, Ready for Acceptance, Payment.

Nov 2013 - Apr 2015

- **AbuAbid Engineering**

Site Engineer

* Sites implementation, expansion, new build, swap, commissioning for Ericsson equipments (RBS 2000, 3000 & 6000 series).

* Microwave links installation with all types (2P, 6P, 20P), VLANs configuration, E1 crossing,..

EDUCATION

2008 to 2013

- **Sudan University of Science and Technology**

Bechalar of Telecommunications

Second Class _ Division One

- **Zain PH20**

Swap Khartoum city from indoor equipment to outdoor (RRU solutions), Ericsson equipment.

I worked as site engineer, responsible for site implementation, integration commissioning and rectification.
- **Zain regional swap project**

All cities except Khartoum and Port Sudan are swapped to Huawei equipment.

I worked as site engineer supported on_site teams to achieve the swap and provide technical support for them.
- **MTN GU Swap**

Swap Khartoum region from ZTE and old Huawei equipments to the latest version, and from indoor to outdoor.

I worked as Quality Control, performing sites audit and to ensure the final deliverables are matching customer requirements.
- **Sudan Sudatel Khartoum Modernization Project**

Expansion for more than 400 sites in Khartoum capital to increase network availability, enhance 3G & 4G data rate and to enhance power solutions.

I worked as QA, set up the quality standard with customer, make trainings for all on_site teams to be aware of the scope and procedures, training for customer itself to be aligned with the system used during the operations, regular meeting with suppliers' top management to stand on the current situation of the project and the enhancements needed to achieve required targets.

I also acting as QC TL to monitor the actual sites situation, guide QC teams to reach the best quality.
- **FSC Strategy Implementation**

Change the overall organization strategy from pure PMO office to FSC structure, which increase resource utilization through resource sharing among different projects even different countries (shared pool methodology).

Establishing new online qualification system for external workforce to ensure the best team readiness. Merge 3 different quality teams from different long-term projects under FSC umbrella, which enhance the efficiency 100%.
- **Zain PH24 Network Modernization**

Site coverage expansion, new 3G, U900 scenario and other network expansion scenarios.

Appointed as Delivery Quality Manager, following the project from initialization phase, set expending expenses for the project life cycle, prepare with technical team the SOP & SOW, hold the project kickoff with customer and related partners, provide technical support for teams when needed, validate the final deliverables with suppliers and make the final handover with customer.
